

Stock

Driving Inventory, Stock and Warehouse Excellence with Control and Visibility

Executive Summary

Managing inventory across multiple stores requires speed, accuracy, and trust in the numbers. iVendNext provides a unified platform for defining items, controlling warehouses, and monitoring stock movements with precision. Serial and batch tracking, flexible UoM conversions, and automated replenishment ensure that inventory flows match business demand. By combining visibility with actionable insights, iVendNext enables leaders and operational managers to streamline operations, maintain compliance, and make procurement decisions backed by accurate, real-time data.

Inventory Master & Item Management

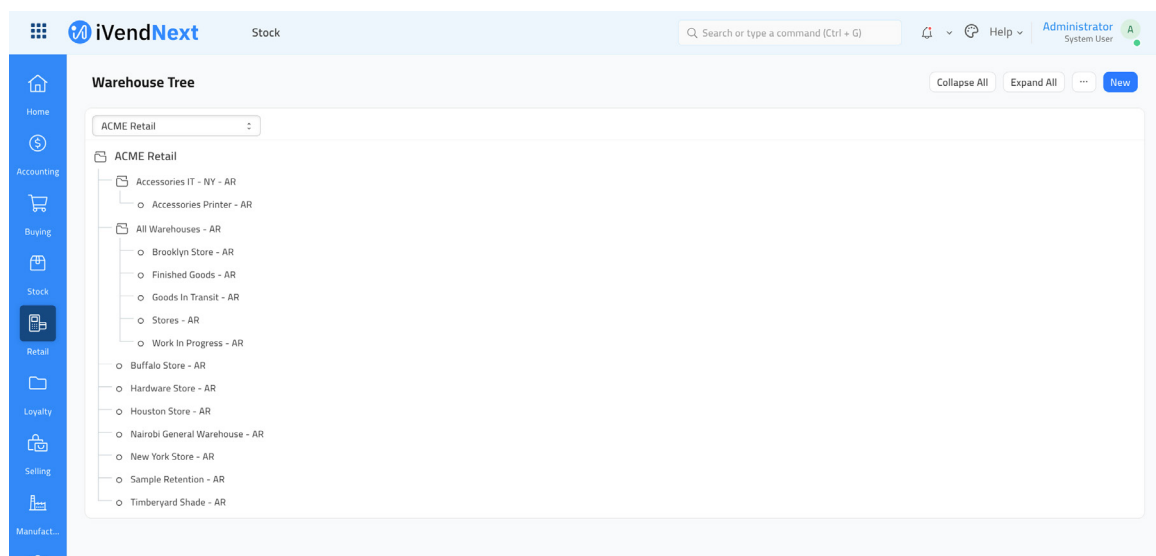

Define and manage inventory items, non-stock goods, serial and batch products, variants, UoMs, groups, pricing, and alternates to ensure accuracy, compliance, and control.

Features	Description
Inventory Item	Track stock items with precision in iVendNext, linking warehouses, valuation methods, and accounts for accurate movement and reporting.
Non-Stock Items	Manage non-inventory goods and services without affecting stock ledgers while still integrating into purchasing and billing processes.
Serial and Batch Managed Products	Define items as serial- or batch-controlled to enable expiry tracking, traceability, warranty handling, and regulatory compliance.
Matrix Items	Configure item variants through attributes like size and colour, generating structured SKUs with individual stock and pricing visibility.
Multiple UoMs and Conversion Rules	Define multiple UoMs per item with conversion factors, ensuring accuracy in buying, stocking, and selling across retail operations.
Comprehensive Item and Item Group Management	Create structured item groups and hierarchies, control defaults, and enable clear reporting by category, supplier, or brand.
Customer and Vendor Items	Maintain alternate customer codes and vendor part numbers to improve supplier collaboration and sales order accuracy.
Alternate Product	Define substitute products to support fulfilment flexibility when primary SKUs are unavailable, reducing lost sales opportunities.
Pricing, Discounts, and Promotions	Configure item pricing, promotions, and tiered discounts with rules that apply automatically across sales and purchasing documents.
Item-wise Defaults for Accounting, Warehouse, Supplier, etc.	Assign defaults like warehouse, supplier, tax templates, and accounts at item level to reduce errors and streamline transactions.

Warehouse Structure & Operations

Organise warehouses in multi-level hierarchies and streamline put-away, picking, packing, and labelling with barcode-driven processes to enable efficient fulfilment.

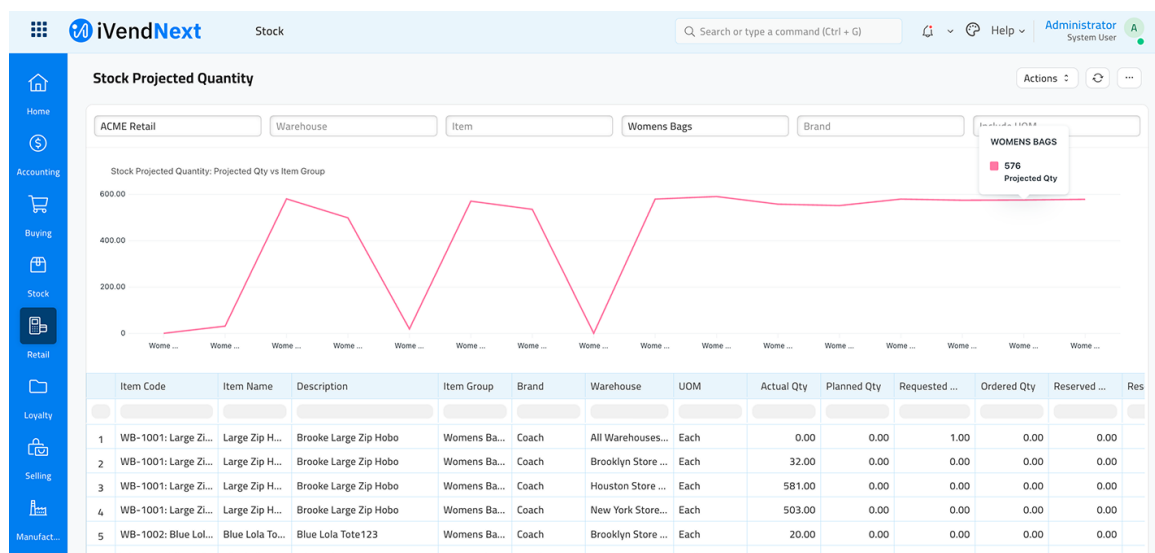

Features	Description
Organised Warehouse Structure (Tree Structure)	Define warehouses in hierarchical trees by region, site, or store to control permissions and enable consolidated or detailed reporting.
Implement Efficient Put-away Rules	Configure put-away rules to direct stock to correct warehouse locations automatically, improving accuracy and reducing storage errors.
Barcoded Pick Lists	Generate pick lists linked to sales or delivery orders with barcode scanning to verify item, batch, and quantity during warehouse picking.
Barcodes and Labels	Assign multiple barcodes to items and print custom labels for tracking, ensuring fast scanning in transactions and warehouse operations.
Optional User-Defined Labels	Design user-defined labels with iVendNext print formats, allowing customised labelling for inventory, packaging, and dispatch workflows.
Packing Definition	Define packing slips with quantities, box configurations, and weights to manage fulfilment, support shipping carriers, and reduce errors.

Stock Control & Transactions

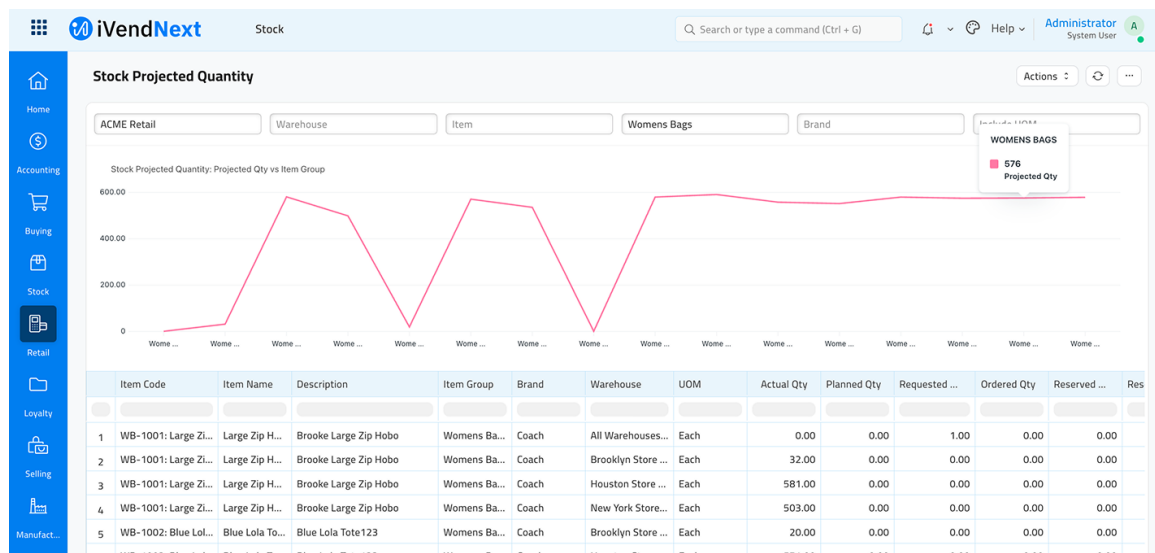

Control all stock movements with accuracy, including receipts, issues, transfers, repacks, bundles, subcontracting, and customer-provided items, fully tracked in iVendNext.

Features	Description
Seamless Stock Transactions: Material Receipt / Issue / Transfer	Record receipts, issues, and transfers through Stock Entry, with automatic updates to stock ledgers and valuation rates in iVendNext.
Warehouse Transfers	Move stock between warehouses or locations with Stock Entry for material transfer, optionally routing via transit warehouses for accuracy.
Stock Movement	Capture all stock movements in real time, ensuring ledgers are updated instantly for traceability and financial accuracy in iVendNext.
Stock Conversions	Repack items or convert bulk into retail SKUs through Stock Entry while maintaining valuation, accounts, and accurate stock balances.
Kitting and Disassembly	Manage product kits using iVendNext Product Bundle; assemble or disassemble SKUs with stock adjustments tracked in the system.
Kits	Define and sell kits as bundled products, where iVendNext automatically manages underlying components during fulfilment and invoicing.
Manage Product Bundles for Simplified Inventory Handling	Create product bundles in iVendNext to streamline the sale of grouped items while stock tracking remains at the component level.
Sales BoM	Use Sales BOM in iVendNext to define and sell parent items while delivering underlying components, ensuring stock accuracy and fulfilment.

Stock Control & Transactions

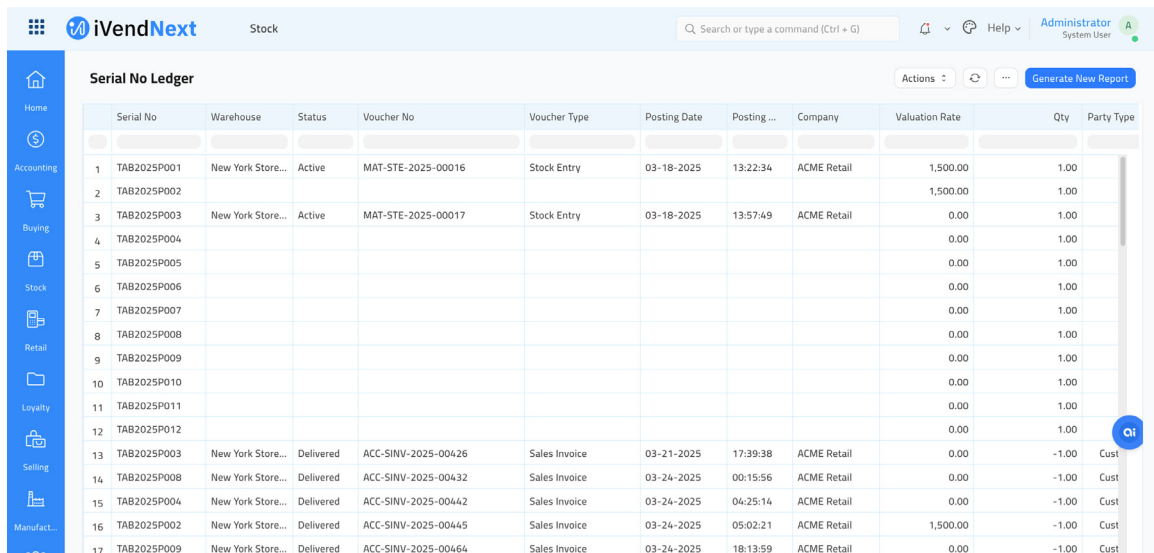

Features	Description
Clear Distinction Between Default Stock UOM and Purchase UOM	Configure separate UOMs for stock and purchasing in iVendNext with auto-conversions, maintaining consistency and reducing transaction errors.
Subcontract to Vendor/Supplier for Streamlined Processes	Track subcontracting by issuing raw materials to vendors and receiving finished goods, with backflushed consumption in iVendNext.
Handle Customer-Provided Items with Ease	Record customer-provided materials in iVendNext, consume them in production or return them as needed, ensuring full traceability and accuracy.
Shipment Creation	Create shipments linked to delivery notes, generate carrier labels, and track consignments directly in iVendNext for end-to-end visibility.
Shipments	Manage multiple shipments in iVendNext by linking carriers, delivery documents, and labels for streamlined logistics and traceability.
Shipping Labels and Documentation	Generate and print carrier-compliant shipping labels, packing slips, and documentation directly from iVendNext for error-free dispatches.
Packing Definition	Define and manage box configurations, packing slips, and weights in iVendNext, ensuring smooth fulfilment and compliance with carriers.

Quality & Compliance

Apply inspections, serial and batch tracking, and verification steps in iVendNext to enforce compliance, guarantee product quality, and ensure stock integrity.

Features	Description
Optional Quality Management	Activate iVendNext quality workflows as needed, applying checks during purchase, production, or stock transactions for improved control.
Comprehensive Quality Inspection Capabilities	Record inspection criteria, sampling, and results in iVendNext, linking directly to purchase receipts, production, or stock entries.
Two-Step Receipt Verification	Enable inspection before acceptance in iVendNext, separating incoming goods into “Received” and “Accepted” for compliance and quality control.
Efficiently Manage Serialized/ Batch Items	Use iVendNext Serial No and Batch doctypes to control traceability, warranty, and expiry for items, ensuring compliance and accuracy.
Lot/Serial Tracking with Attributes and Shelf Life	Define shelf life, track serials with attributes, and enforce expiry rules in iVendNext to guarantee safe, compliant inventory handling.

The screenshot shows the 'Serial No Ledger' interface in iVendNext. The interface includes a sidebar with navigation icons for Home, Accounting, Buying, Stock, Retail, Loyalty, Selling, and Manufacture. The main area displays a table with columns: Serial No, Warehouse, Status, Voucher No, Voucher Type, Posting Date, Posting Time, Company, Valuation Rate, Qty, and Party Type. The table lists 17 entries, with the first 12 entries having a status of 'Active' and the last 5 entries having a status of 'Delivered'. The 'Company' column for all entries is 'ACME Retail'. The 'Valuation Rate' column shows values of 1,500.00, 0.00, and 1,500.00. The 'Qty' column shows values of 1.00, -1.00, and 1.00. The 'Party Type' column shows values of 'Cust' and 'Cust'.

Stock Visibility, Planning & Replenishment

Gain real-time stock visibility and automate replenishment in iVendNext with projected quantities, shortage alerts, and material requests to ensure optimal availability.

Features	Description
Warehouse-Specific Stock In-Hand Account	Link warehouses to distinct accounts in iVendNext for accurate valuation, enabling precise financial tracking by site or region.
Accurate Stock Balance Tracking	Use iVendNext stock reports for real-time balances across items and warehouses, ensuring reliability for purchasing and planning.
Replenishment	Automate replenishment in iVendNext by creating material requests when stock levels fall below reorder points, preventing stockouts.
Smart Auto Reorder Functionality	Configure auto-generation of purchase or transfer requests in iVendNext, maintaining availability without manual monitoring.
Timely Item Shortage Report Generation	Identify at-risk items with iVendNext shortage reports, enabling proactive procurement and avoiding lost sales.
Facilitate Material Requests with Ease	Raise material requests in iVendNext for procurement, transfers, or production, supporting controlled, demand-driven replenishment.
Projected Quantity Report for Strategic Planning	Review projected quantities in iVendNext by combining on-hand, ordered, reserved, and planned stock for accurate forecasting.

The screenshot displays the iVendNext Stock report interface. The title is 'Itemwise Recommended Reorder Level'. The report is filtered by 'Womens Bags' and shows data for the period 01-01-2025 to 09-19-2025. The table lists 10 items with their respective reorder levels and other stock metrics.

Item	Item Name	Item Group	Brand	Description	Safety Stock	Lead Time Da...	Consumed	Delivered	Total Outgoing	Avg Daily Outgoing
1	CW-1001	Clutch Wallet	Womens Ba...	CW-1001	0.00	0.00	0.00	0.00	0.00	0.1

For comparison, use >5, <10 or =324. For ranges, use 5:10 (for values between 5 & 10).

Execution Time: 0.026949 sec

Reporting & Analytics

Use iVendNext's built-in reports for ageing, valuation, turnover, reconciliation, and stock ledgers to gain actionable insights and optimise inventory performance.

Features	Description
Insightful Stock Ageing Report	Analyse ageing of inventory in iVendNext to identify slow-moving items, reduce holding costs, and improve procurement planning.
Detailed Stock Ledger / Register	Track every stock movement with iVendNext's Stock Ledger, providing transparency for audits, reconciliation, and financial reporting.
Stock Turnover / Turnover Inquiry	Monitor inventory turnover in iVendNext to assess efficiency, balance stock levels, and optimise purchasing strategies.
Unlimited Inventory Dimensions for Tailored Management	Apply custom dimensions in iVendNext for detailed analysis by store, region, or channel, enabling precise inventory reporting.
Choose Between Perpetual and Periodic Inventory Systems	Configure iVendNext for perpetual or periodic inventory methods to match your accounting policies and compliance needs.
Inventory Valuation / Varied Item-wise Stock Valuation Methods	Use iVendNext to value stock by FIFO or Moving Average, ensuring accurate costing for financial and procurement decisions.
Streamlined Stock Reconciliation Processes	Run iVendNext Stock Reconciliation to align book and physical counts, improving trust in data and planning accuracy.
Physical Inventory	Conduct periodic physical counts in iVendNext, reconcile discrepancies, and strengthen accuracy of stock and financial records.
